Weymouth's Voters go to the Polis.

The chilly wind of Monday no Hinderance to a Fairiy Average Vote.

Three New Members on the Board of Select men. A Woman on the School Board, and the Town No License.

Monday was a fairly average March day, and it being the day for the inual election of town officers, a fairly average vote was cast. Elements entered into the campaign which have not been in it for many years, and the result was looked forward to with many doubts and fears on the part of me of the camildates and their friends.

As usual, the voting began at alk o'clock A.M., and while there was n articular rush at any time during the day, the several precinet officers were kept luny until the polls were closed, with a total of 1896 votes, or 102 leus than the previous year, and the result was as follows:

NOW LOOK OUT!

"Take care of yourself," say onr frienda.
"Tiltry to," we answar. We do take a little care, yst in spite of warm clothes, rubbers and mackintoshee, an army of people were bowled out by pnaumonis and ether lung and chest diseases last wintay. They caught cold, neglected it, led it fix upoe there, were torn by cooghs, choked by inflaomoticos and congestions, wasted by faver, tirad out by pain and than gava up the fight. The hour you realize that yon have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are esseded make it say. No harm if you were covered with them. They act quickly and prayant the acgorigment of blood in the organs. In this way—with erdinary ear.

begins a limited engagement at the Commin Theatre, Hoston, March 17. This imposing specific is a serman in varied speech, illustrated by ari and music. Its trond of suggestion is forward and upward. The curida rises on the Threa Wisa Men in the Deserting of the liming Star of Hethichen, the men's hands raised in awe unifercamels. The dreary waste of aridity is wanderfully impressive. Then comes the brilliantly colored pictures of the house-tops of Jerusalem, the terrace of the Palace of Hor. Next is one of the great scenes of the play—the ilm interior of the Human galisy ship—the muscular, grim-visaged shures tagging in rythmic mulian at the oars, than the wreck, Hen Hur and his captain strugginging in the waves. The scena changes to the hume of simonbles, a mannent later comes the relain of the simili Grove of Daphine with the Superb temple, reared to the Gol Apolic; Housan maiden admorphyon-ly, had the contraligner is then Hur, the saidler, stern and unreliability.

Again the scene changes, and we not interest the mass of the play of the play of the scene changes, and we not describe the torpic of the line. The scene changes is the description of the blood, adminishing the scene changes, and we not describe the torpic of the blood, adminishing the science of the blood, adminishing the science of the play of the contraling the science of the play of the contraling the science of the contraling the contraling the science of the play of the contraling the science of the play of the contraling the science of the line of the contraling the science of the line of the contraling the science of the line o and unrelenting.

Again the scene changes, and we are at the Funntain of Castulla—: lake the Funntain of Castulla—: lake was peracive, beloved friends, that
